Keynote Speaker & Panelist:

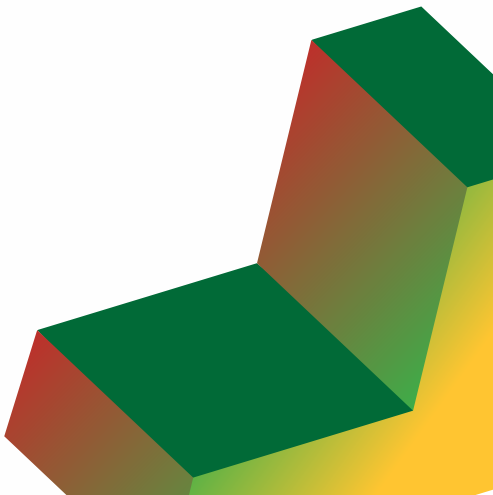

Ms Janel Jin

Strategy and Growth Operations,
Holmusk

Janel Jin manages strategy and growth operations at Holmusk, a global healthtech company building the largest Real-World Evidence platform for behavioral health. Her career has focused on making data-driven healthcare a reality, anchored by a commitment to making healthcare better and more equitable. Currently based in Singapore, her experience spans policy, research, and implementation in the US and APAC. She previously drove strategic special projects at a corporate healthcare provider with presence in 10 APAC markets, and prior to that was with the US federal government at the CMS Innovation Center.

Janel holds a Master's degree from Johns Hopkins School of Public Health and a dual BA in History of Science and Biology from The University of Chicago.

Keynote Speaker & Panelist:

Ms Janice Weng

Senior Assistant Director, MOH Office
for Healthcare Transformation

Janice is a Senior Assistant Director in MOH Office for Healthcare Transformation (MOHT). She leads the digital mental health and wellness programme within the Integrated Health Promotion team. The team focuses on identifying and co-creating innovative digital solutions with citizens and ecosystem partners to improve the wellness journey across life stages.

A key initiative developed during the pandemic period is mindline.sg, an anonymous self-care and self-help therapy platform. As the project lead, Janice worked with a talented team of physicians, psychologists, social scientists, tech developers and designers to develop this person-centric solution. What keeps Janice motivated is her passion to experiment with intuitive design and cutting-edge technologies in helping Singaporeans of different profiles cope with the everyday stressors in life.

Prior to joining MOHT, Janice held leadership positions in consulting firms and led teams to deliver policy consulting, and business and digital transformation projects for public sector clients. She has a Master in Public Policy from the Lee Kuan Yew School of Public Policy. Outside of work, Janice enjoys learning about different cultures and human experiences, so come talk to her about your unique self!

Panel Discussion Panelist:

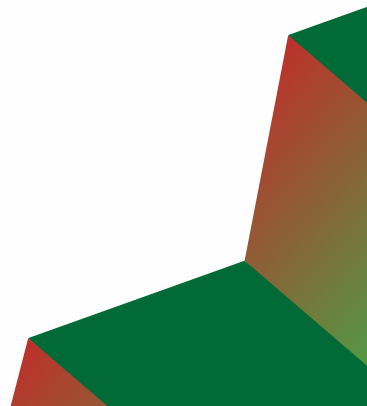

Prof Daniel Fung

Chief Executive Officer, Institute of
Mental Health

Dr Daniel Fung is a child and adolescent psychiatrist and also the CEO of the Institute of Mental Health in Singapore. He is an Adjunct Associate Professor at all 3 Singapore medical schools. Dr Fung is the President of the International Association for Child and Adolescent Psychiatry and Allied Professions and President of the College of Psychiatrists, Academy of Medicine, Singapore. Dr Fung has co-authored over 200 peer reviewed research papers, books and book chapters. Dr Fung has actively been involved in developing telepsychiatry in Singapore and has also developed a number of digital mental health solutions in the last 10 years including a patented novel treatment for ADHD.

Panel Discussion Moderator:

Mr Andrew Cleeland

Chief Executive Officer,
Fogarty Innovation

Andrew is a seasoned executive with over 30 years' experience in the medical device industry. He has held key leadership positions in organizations ranging from early stage start-ups to large multinationals during this time. In joining Fogarty Innovation, he further broadens this range of experience to include managing a non-profit. The versatility required to be effective across such diverse groups is rare and is a testament to Andrew's strong leadership skills.

After completing his undergraduate degree at the Swinburne Institute of Technology, Andrew began his MedTech career working for the Australian Therapeutic Goods Administration. Several years into this role, he was offered a unique opportunity to work for a company based in the United States. Although he had never lived outside Australia, he saw it as a great opportunity and moved sight unseen to Denver, Colorado to work for Teletronics. At the time, Andrew expected this to be a two-year position. Thirty years later, he's still in the US, setting and achieving big goals.

Panel Discussion Moderator:

Mr Andrew Cleeland

Chief Executive Officer,
Fogarty Innovation

After Teletronics, he accepted a role as Vice President of Clinical and Regulatory Affairs at Bay Area start-up company Radiant Medical. Following this, he was CEO of Ardian, which pioneered the use of renal denervation to treat hypertension. Ardian was acquired by Medtronic in 2011 in a transaction valued at over \$1.3B which, at the time, was the largest medical device acquisition ever for a pre-revenue medical device company.

Andrew took role of CEO at Twelve, a startup in the transcatheter mitral valve space. Several years after his joining, this company was also acquired by Medtronic in a transaction valued at \$458M.

He currently serves on the board of three venture-funded companies — Saluda Medical, Zenflow, Inc. (chairman) and MMI S.p.A. (chairman). He also holds advisory positions at several top-tier venture capital firms: Longitude Capital, Arboretum Ventures and Qiming Ventures. At a global industry level, he has been invited to serve on multiple initiatives including the UCSF-Stanford Pediatric Device Consortium; the Medical Device Innovation Consortium; and the Singapore government's Biomedical Research Council (BMRC).
