HEALTH AND MEDTECH PROJECT MANAGEMENT +

Project Risk Mitigation, Stakeholder Engagement and Detailed WBS Breakdown

TGS-2025056059

Information updated as of September 2026*

Original Price	After SWDA Subsidies SC < 40yo & SPRs	SC ≥ 40yo & enhanced training support for SMEs
SGD 1,308	SGD 708	SGD 468

The workshop aims to to equip project managers (whether part-time or full time) of translational health & medtech projects at TRL 3 -4 and project budgets of S$250k – 750k with the knowledge and skills to:

- Develop key project objectives and deliverables,
- Recognize and develop the multidisciplinary clinical, technical and business project activities across a range of medical devices and
- Recognize and manage projects risks by aligning with multi-disciplinary stakeholders; and to develop a detailed budget and resourcing plan.

In this programme, participants will foster attributes to become resourceful and analytical, with the ability to independently plan and manage project resources and obtain buy-in amongst multi-disciplinary internal and external stakeholders to drive a TRL 3 – 4 health and medtech project towards completion in a timely and effective manner.
